Popular Destinations by Bus

Consult printed schedules or www.triplanner.metrokc.gov for exact times. Travel times are an estimate. Routes marked with “+” (Peak-Only Route) operate only during peak commute times: weekday mornings and afternoons. Most of these routes carry riders toward Seattle in the morning and to Redmond in the afternoon. Exceptions: routes 269 and 291 operate both ways during peak hours, and route 242 comes from north Seattle in the morning and returns in the afternoon.

How to Ride the Bus

Go to the closest stop for your bus at least five minutes early. When the bus approaches, check the route number and destination on the front window. Also, check to see if it is a local or express bus (express buses stop only at a few major stops and skip the rest.) If you are unsure, ask the driver. When you get on, check the farebox for information about when to pay your fare and how much. On some buses, you pay as you board, while others collect fares when you get off. Before the stop closest to your destination, pull the cord above the window or press the yellow strip that runs along the windows to request the next stop.

Loading Your Bike on the Bus

- ◆ Have your bike ready to load. Remove water bottles, pumps or any loose items.
- ◆ Always get the driver's attention before you load or unload your bicycle.
- ◆ Always load from the curb side of the street.
- ◆ Place bike in outside slot of rack if empty.
- ◆ Make sure the support arm is resting on the tire and not on the fender or frame.
- ◆ Sit in front and keep an eye on your bicycle.
- ◆ Return empty rack to the upright position after you remove your bicycle.
